Air Curtains are the best products to keep your surroundings clean and tidy. They are installed above the door and make an invisible layer of curtain that stops the germs and bacteria from entering the place. Whenever you enter inside and the door is opened, the curtain starts working and kills all the dirty particles that try to enter the surrounding. Along with it they also control dust, air pollutants and bad odour to enter the environment.

Inhaling fresh and purified air is the best thing to be healthy and safe. They can be found in industries, malls, airports and hospitals that keep the place neat and tidy. People who have asthma problems and other airborne diseases should use air curtains so that they remain safe and protected from pollutants. They are the best products for commercial as well as non-commercial places.

Advantages

1. Keeps the atmosphere around you hygienic and healthy
2. Shield to avoid airborne dust, pollution and bad odours
3. It has the quality of Pest and insect control
4. Energy Saving
5. Works as an obstacle against fire smoke
6. Decreases the CO2 emissions
7. Entrance areas remain climate protected

Air Curtain Sensor also Available.
